India.

ABOUT ME

A driven and forward-thinking technologist with a robust foundation in Artificial Intelligence, Machine Learning, Cybersecurity, and Full-Stack Development. Passionate about architecting intelligent, secure, and scalable systems that solve real-world problems. Committed to lifelong learning, innovation, and leadership in fast-evolving tech environments. Adept at bridging deep technical expertise with strategic vision to contribute meaningfully to AI-first and security-conscious development initiatives.

Technical Skills

- **Languages:** Python, JavaScript, HTML, CSS, Java, C
- **Web Dev:** React.js, Node.js, MERN Stack
- **AI/ML Tools:** Scikit-learn, Open Source models, NLP, Hugging Face
- **Cybersecurity:** Kali Linux, File scanning tools
- **Dev tools:** Github, VS code, MySQL Database.
- **Soft Skills:** Leadership, Adaptability & Flexibility, Collaboration

EDUCATION

- **Bachelor of Engineering in Computer Engineering**
C.K. Pithawala College of Engineering & Technology, Gujarat
Graduation: Pursuing
- **12th Grade (Science Stream)**
Gurukul V.V.T.C ENG MED School, Surat
April 2021 – March 2022

ACHIVEMENTS

- Selected as **Technical Head & Cybersecurity Lead** at Google Developers Group
- Completed prestigious **SAP, DeepLearning.AI** and **Machine Learning** programs.

PROJECTS

BIZZ_PORTAL

An enterprise-grade dashboard enabling real-time analytics, business data management, and secure multi-role access for decision-makers.

Demo: <https://v0-image-analysis-murex-theta.vercel.app>

GitHub: https://github.com/Jinish2170/DE_BIZZ_PORTAL.git (with backend)

- Database Design (MySQL): Structured schemas for clients, transactions, and metrics with optimized queries for analytics
- Backend (Node.js / Express / TypeScript): REST API with role-based JWT auth and secure CRUD for business data
- Frontend (React.js / Next.js / TypeScript / Material UI): Dynamic dashboards using Recharts, charts, filters, and responsive UI
- State Management (Redux Toolkit): Central store for user/auth/data with real-time updates via Socket.io
- Styling (Tailwind CSS): Clean, mobile-first UI with theme toggle, accessibility features, and consistent layout
- Data Operations (JavaScript): Excel-compatible CSV import/export and PDF reporting using jsPDF
- Deployment (Vercel): CI/CD-enabled deployment on Vercel (frontend only)

BigTechTimes – Tech Community Frontend Platform

A responsive and animated community website for publishing, discovering, and discussing the latest in technology.

GitHub: <https://github.com/Jinish2170/BigTechTimes.git>

- Frontend (React.js / JavaScript): Built modular static pages with dynamic content rendering and routing
- Styling (Tailwind CSS / Headless UI): Utility-first design system for responsive, accessible, and visually-rich UI
- Animations (CSS Keyframes / JavaScript): Smooth scroll effects, interactive UI transitions, and real-time comment flows
- Performance: Code-splitting (React.lazy), lazy loading, and semantic markup for fast load times and SEO

EXPERIENCE

- **Software Development Intern**
Cognifyz Technologies
Sep 2024 - Oct 2024
- **Freelancer**
Part-time
