India.

ABOUT ME

While I have explored several technologies during my studies, I have deliberately chosen to focus on **Node.js/Express** for backend and **Flutter/Dart** for mobile development. This allows me to deepen my skills and deliver code that is practical and ready for real use. I keep my skill set focused on what I can apply effectively in production. Alongside this focused effort, I have also explored areas like **automation, AI/ML, and cybersecurity**, not as core skills, but to broaden my perspective and give me a wider context for solving problems.

EDUCATION

- **Bachelor of Engineering in Computer Engineering**
C.K. Pithawala College of Engineering & Technology, Gujarat
Graduation: Pursuing
- **12th Grade (Science Stream)**
Gurukul V.V.T.C ENG MED School, Surat
April 2021 – March 2022

EXPERIENCE

GenAI Intern — AbrossIt
Jun 2025 – Aug 2025

- Explored backend integration of **GenAI APIs** and cloud speech services.
- Worked with **Node.js + Express** to build proof-of-concept APIs for summarization and transcription.
- Learned prompt handling, API response structuring, and basic deployment practices.

ACHIVEMENTS

- **Selected as Technical Head at Google Developer Group (GDG) CKPCET (2024–25)** — led workshops, mentored peers
- **Completed industry-recognized certifications:** Advanced Learning Algorithms(Stanford /DeepLearning.AI) and SAP Certificate (Python, AI, Conversational AI).

TECHNICAL SKILLS

Core Development (Focus):

- **Backend:** Node.js, Express.js, RESTful APIs, MongoDB, MySQL
- **Frontend & Mobile:** Flutter (Dart), React.js, HTML, CSS, JavaScript

Complementary Tools & Areas (Exploration):

- **AI/ML (Explored):** Scikit-learn, NLP basics, Hugging Face
- **Automation & Workflow:** n8n, scripting utilities
- **Other Languages:** Python, Java

Development & Collaboration Tools:

- Git, GitHub, VS Code, Android Studio, Postman, Docker (basic)

PROJECTS

1. **TalkNotes — AI-Powered Audio Note Backend**
(*Node.js, Express, MongoDB, Gemini AI, Google Speech-to-Text*)
 - Built backend to transcribe and summarize voice recordings using Google Speech-to-Text and Gemini AI.
 - Implemented secure user flows with JWT and bcrypt, handled audio storage via Cloudinary, and CRUD operations in MongoDB.
 - Built consistent API structure with CORS, error handling, and logging.
 - Github link :- <https://github.com/Jinish2170/Talknotes.git>
2. **Skill-Tracker — Flutter Skill Management App**
(*Flutter/Dart*)
 - Created a Flutter app that allows users to add skills, track progress, and set goals.
 - Implemented **Provider** for central state management, ensuring consistent data flow across widgets and improving scalability.
 - Organized codebase modularly (models, screens, widgets) for easy maintenance and extension
 - Github link :- <https://github.com/Jinish2170/Skill-Tracker.git>
